Yes and I've forwarded your request to our Headquarters and Regional officers.

I think we'll have a much better idea of where we stand tomorrow morning. But why don't you send me a line tomorrow morning so we can see where we stand?

Hi Robert,  
Thanks for getting back to me. If you can't find someone live, maybe we can do a pre-recorded interview. We really want to hear from the EPA on the show.  
Thanks,  
Monica

Hey Monica,

As you can imagine, we have lots of inquiries coming in on the Gold King Mine release, so I don't know how soon we'll have people available for an interview or a line call-in show.

This said, I'd encourage you to listen daily to daily media calls at 5 PM Eastern Time (3 PM Mountain). The call-in info:

**WHO:** EPA Officials from Denver, Dallas and San Francisco (varies by date)  
**WHEN:** August 10-14, 3 PM (Mountain, MT)

**WHERE:** Conference Dial-in Number: 1-866-900-8984  
Conference Identification: 9662033, Gold King Mine Release - EPA Media Update

Also, maybe you can check back tomorrow? We'll have more people on the ground in Colorado and I can forward them your request.

Subject: Native America Calling radio show

Hi Robert,

I am producing a show for the radio program Native America Calling about the spill in the Animas and San Juan. Our show is a live call-in radio show on about 70 stations across the US. We'd like to talk about the spill, what the EPA is doing to clean it up, particularly on tribal land. Our show is live at 1pm eastern. I'd like to do a pre-interview with whomever is available to be on the show, you are welcome to sit in on that call. If you aren't the right person to connect with about this, please do let me know.

Thanks,  
Monica
